WHAT IS PIGGING?

WHAT IS PIGGING?

Pigging is technology for recovering trapped product in process pipelines. Pigging works by propelling a cylindrical elastomer with compressed wiping discs, the "pig", through the pipeline. As the pig travels from source to destination, it pushes out the trapped product while simultaneously cleaning the pipeline walls.

PIGGING BENEFITS

Pigging Solutions systems are designed to help you get the most out of your manufacturing. Our benefits will allow you to see return on investment (ROI) in less than a year and often less than six months. Some of the benefits our systems provide include:

- Recover saleable product from transfer lines
- Eliminate flush waste and cross-contamination risk
- Reduce dedicated piping
- Faster change-over times and reduced inventory
- Increased batch yields and reduced raw material and energy consumption
- Achieve sustainable manufacturing goals
- Increase profits and a competitive advantage

OPERATOR SAFETY & EASE-OF-USE

Pigging Solutions is the industry leader in operator safety and ease-of-use. No tools are required to perform routine pig maintenance and operators easily can access the pig in less than 15 seconds. The patented Locking Quick Connect (LQC) locks under pressure. Because of this patented safety feature, pig removal and insertion is easy and eliminates "stuffing" or "tugging."

CAPABILITIES & EXPERIENCE

Pigging Solutions is your go-to source for all your pigging application needs. We offer a broad range of system options and capabilities to meet your specific application and budget needs. From system design and supply to on-site commissioning and on-going support, we work with clients and contractors to ensure pigging is always the solution and never the problem.

APPLICATIONS & INDUSTRIES

Our pigging systems are used in a wide range of industries and product applications. Whether your application calls for the product recovery of challenging chemicals from ASME piping, or the recovery of sensitive high-purity products from sanitary tubing, Pigging Solutions has the systems and expertise to meet your application requirements. Some examples of our industry applications include but are not limited to:

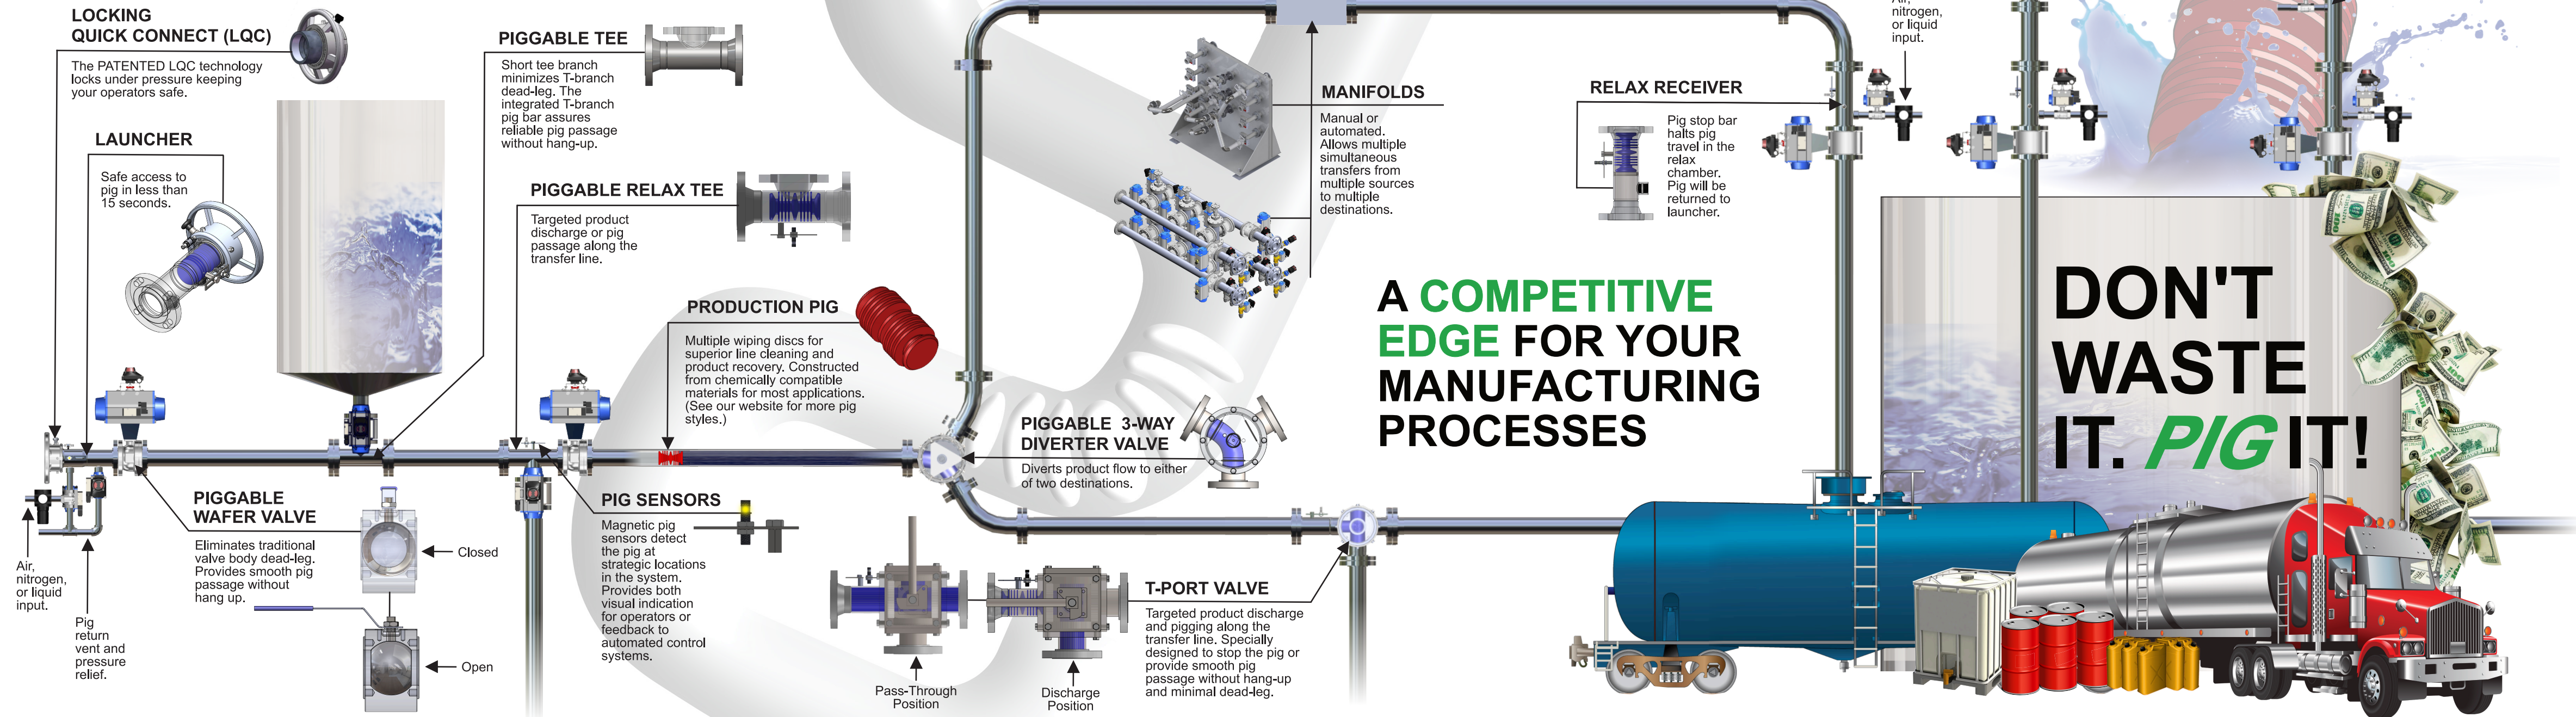

- Soaps, body wash, lotions, cremes
- Food, condiments, batters, cheese, dairy
- Alcoholic and non-alcoholic beverages
- Pet food and pet care products
- Detergents, fabric softeners, bleach
- Cleaners, sanitizers, polishes
- Paints, coatings, adhesives, inks, dyes
- Resins, solvents, surfacants, caustics
- Lubricants, oils, greases, additives
- Break fluid, antifreeze, car care products
- Herbicides, pesticides, fertilizers
- Intermediate "building block" chemicals

**IF YOU CAN PUMP IT,
WE CAN *PIG* IT!**

**SEE ROI IN LESS
THAN 12 MONTHS
(OFTEN LESS THAN 6 MONTHS)**

**FROM ANY SOURCE TO ANY DESTINATION, RECOVER
OVER 99% OF PRODUCT IN TRANSFER LINES**

**A COMPETITIVE
EDGE FOR YOUR
MANUFACTURING
PROCESSES**

**DON'T
WASTE
IT. *PIG* IT!**
