PIGGABLE SCHEDULE 10 WAFER BALL VALVES

INCREASE FLOW RATES

The ONLY Schedule 10 Wafer Ball Valve with a TRUE Schedule 10 Internal Diameter

Do your product transfer operations utilize a piping system with a schedule 10 internal diameter? Don't settle for standard full port valves that restrict flow rates. Get the most out of your investment with Piggig Solutions' Schedule 10 Valves with a true sch 10 ID.

Our sch 10 valves provide significant flow rate improvement over standard full port valves. The wafer body design also saves space and eliminates residual product dead-leg associated with standard body ball valves.

- + ANSI B16.34
- + Available in 2", 3", 4", and 6" pipe sizes
- + Fully piggable
- + Fire safe options available

ONLY AVAILABLE AT PIGGING SOLUTIONS.
