PIGGING & CHOCOLATE MANUFACTURING

Whether transferring chocolate liquor or cocoa butter for conching or transferring from conch mixers to molding or truck loading, a Pigging Solutions pigging system will recover over 99% of the chocolate product from transfer lines.

Without product loss, transfer line flushing, cross-contamination risk, or dedicated piping, Pigging Solutions pigging systems provide the capability to cost-effectively transfer your valuable product throughout the chocolate manufacturing process. Our pigging systems **can recover over 99% of the product trapped in transfer lines** which leaves the piping clean and ready for the product. Pigging Solutions works directly with our chocolate manufacturing clients to design systems meeting their specific application needs

What are the major cost saving benefits to chocolate manufacturers?

- + Recovery and sale of previously trapped product in transfer lines
- + Eliminate cross-contamination risk and product waste between product transfers
- + Reduced waste increases batch yields and reduces raw material and energy consumption
- + Reliable product quality from transfer to transfer
- + Supports sustainable manufacturing goals
- + Accommodates a diverse product line and smaller batch runs
- + Promotes a more competitive market position with lower operating costs
- + Rapid payback and ROI

Why choose Pigging Solutions?

Industry Knowledge

We understand the needs of chocolate manufacturers and can design a cost-effective system to meet the specific application needs.

Wide Range Of Application Solutions

Whether the application calls for a simple manually operated point-to-point system or the need is for an automated system to make simultaneous transfers from multiple sources to multiple destinations, Pigging Solutions can design a system that meets the application requirements.

Safety and Ease-Of-Use

All pig launching systems from Pigging Solutions are equipped with the patented LQC pressure locking safety closure. The LQC closure design mechanically locks under pressure and cannot be removed, thus providing operators with safe access to pigs for routine maintenance in less than 15 seconds.

On-Site Services

Pigging Solutions works with clients and contractors to ensure proper installation and provides on-site startup, commissioning, and training services.

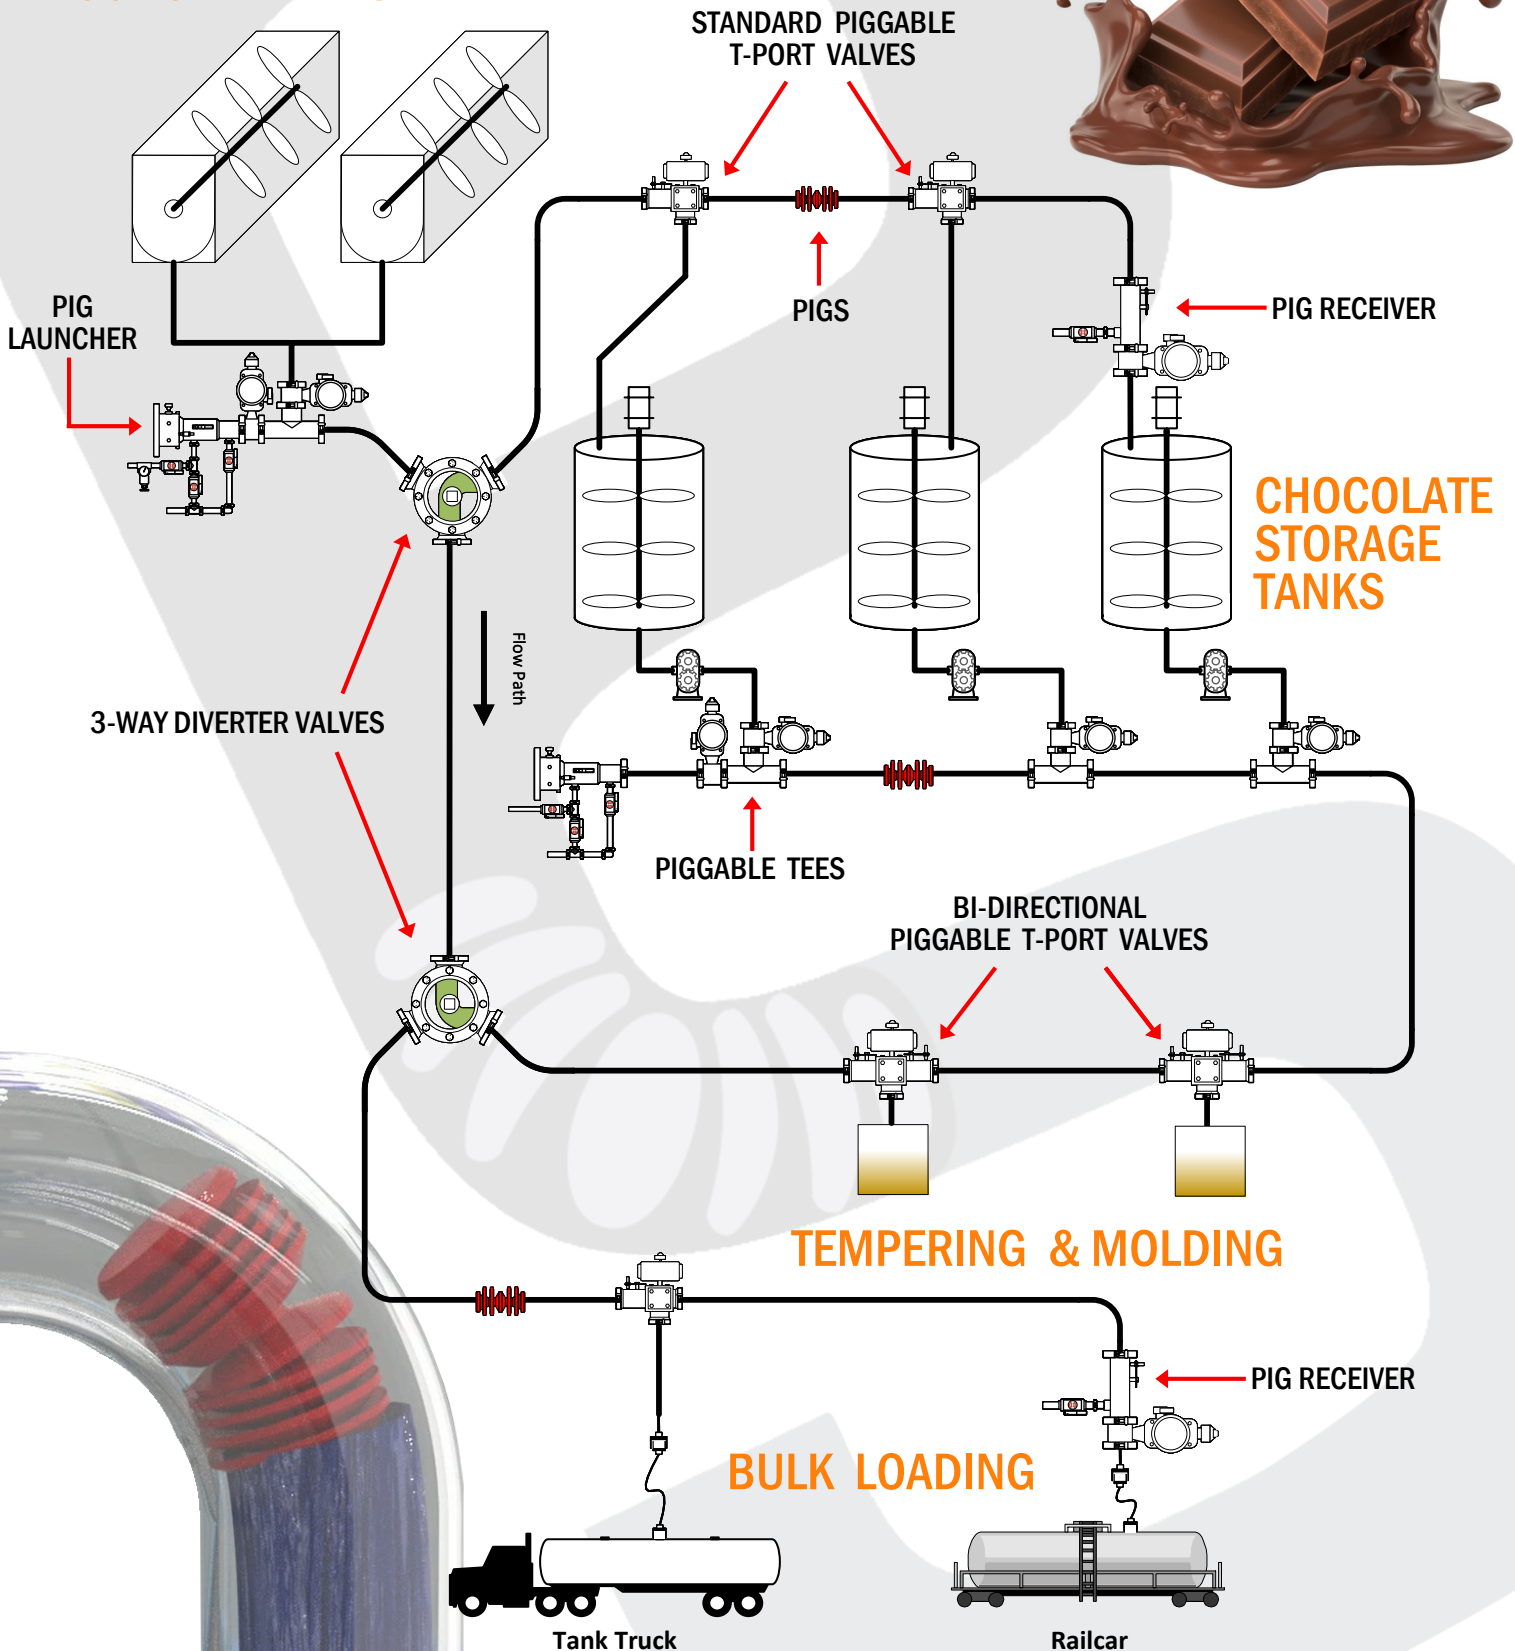

Ongoing Support

Ongoing support after system installation ensures continued satisfaction with system operations.

To learn more, contact an industry specialist to set up a meeting or complimentary site visit to review your chocolate transfer process and potential cost saving benefits of a Pigging Solutions product recovery pigging system. Or you can visit our website where you can learn more about Pigging Solutions and see typical pigging system process flow diagrams.
