PIGGING FOR PERSONAL CARE PRODUCTS

The Personal Care products market is projected to be 93 billion USD in 2023 and grow 2.52% annually through 2028. High product purity with low manufacturing costs is typically a challenge to achieve, but Piggig Solutions can make it a reality and help you keep up with rapid growth!

Some of the benefits that Piggig Solutions offers:

- + Recovery of trapped transfer line product
- + Abolishment of flush waste
- + Elimination of cross-contamination
- + Increased batch yields
- + Reduction in manufacturing costs
- + Meeting sustainable manufacturing goals

There's simply no better alternative for achieving your product goals than one of the many product recovery pigging system options from Piggig Solutions. Hand cleaners, bath wash, lotions, creams, toothpaste, perfumes, and colognes! We can help you pig and save on each of these and more by working with each client to provide a system that meets their required application needs.

To learn about these, and many other benefits that pigging systems provide, visit our website for information and to receive a free review!
