

The background of the entire image is a grayscale industrial scene featuring a complex network of pipes, valves, and machinery. Overlaid on this are several large, iridescent bubbles that catch the light, creating a shimmering effect. In the lower right corner, there is a large, overflowing pile of US dollar bills, primarily \$100 bills, which appear to be falling or spilling out from the industrial structure.

PIGGABLE BENEFITS FROM ENHANCED SANITATION

The logo consists of a stylized 'P' that is white with an orange-to-yellow gradient at the bottom, resembling a pig's tail.

PIGGING
SOLUTIONS™

ENHANCED SANITATION

How can our pigging systems enhance your sanitation process?

Our pigging systems recover over 99% of product in transfer piping, leaving it empty and ready for sanitation. Allowing you to start and end your sanitation processes with an empty line so you can save on your bottom line.

In today's fast-paced, consumer-focused, inflated economy, saving time between product runs, reducing flush waste can make a huge difference on your company's bottom line. Our pigging systems recover over 99% of product in transfer piping, leaving it empty and ready for sanitation.

Benefits of enhancing your sanitation processes with a pigging system:

- Increase batch yields
- Eliminate flush waste, disposal expenses, and on-site waste recovery or treatment costs
- Reduce product change over times
- Reduce water and energy consumption
- Sustainable manufacturing practices
- Competitive advantage
- ROI in less than 12 months

See interactive typical applications on our website. Contact our Engineers today to discuss your custom solutions that could save you thousands.
